Lo-tox Laboratory Thermometers

LO-tox™ is an organic filling specially chosen to achieve a wide temperature span and provide the lowest practical levels of hazard in our laboratory thermometers. The quality and legibility of our Lo tox laboratory thermometer make these an ideal substitute for mercury thermometers. Fitted with a Brannan non roll end cap which have a ring to allow the thermometer to be suspended and eliminate breakages.

Our lo tox range is only a small section of our [full laboratory thermometer range](#) which we have been manufacturing in the UK for over 100 years.
