DT85GM Series 4 Data Logger
Intelligent Data Logging Products

Geotechnical Logger
Advanced design and technology plus 25 years of geotechnical expertise have produced the dataTaker DT85GM GeoLogger – A versatile, powerful – yet low power & cost effective data logger.

It support vibrating wire and other geotechnical sensors such as Slope Indicator, RST Instruments, Geokon, Soil Instruments, Roctest, AGI – Applied Geomechanics Inc. DT85GM is also capable to test sensor integrity through audible frequency

With temperature compensation (thermistors), 16 analog channels are capable to read up to 16 vibrating wire sensors. If temperature compensation is not required this logger can read up to 48 vibrating wire sensors.

Further expansion up to 320 sensors (with temperature compensation) or 960 sensors (without temperature compensation) is possible.

Designed For Remote Applications
The dataTaker DT85GM intelligent data logger is a fully featured low-powered logging platform with an integrated cellular modem, making it perfect for remote applications. The rugged design and wide operating temperature range of the DT85GM provides reliable operation in virtually any environment.

The DT85GM’s perfect balance of performance with low-power also allows you to use a smaller solar panel without compromising on functionality.

Automatic Data Delivery
Forget travelling long distances to get your data. Utilise the DT85GM’s automatic data delivery features to schedule your data to be automatically emailed to your inbox every day, week, month or other time interval.

More sophisticated systems can make use of the automatic data delivery features to send logged data to an FTP server. Alarm conditions can also trigger data delivery in addition to sending alarm messages to multiple email addresses or mobile phones.

Easy To Configure
The DT85GM is configured directly in your web browser using dataTaker’s dEX graphical interface. dEX takes you through the configuration of your logger, showing you wiring diagrams and allowing you to decide -- in as much or as little detail -- how you want to the system to work, suiting both novice or advanced users.

Using the internal modem you can even re-configure your system remotely over the internet if required.

Applications include:

<table>
<thead>
<tr>
<th>Land Slide Prevention</th>
<th>Mining Exploration</th>
<th>Concrete Curing</th>
</tr>
</thead>
<tbody>
<tr>
<td>Dam Wall Monitoring</td>
<td>Tunnel Excavation</td>
<td>GPS</td>
</tr>
</tbody>
</table>

• Vibrating Wire Support
• Carlson, Electro Level & LVDT support
• Strain Gauge Support
• Dual Channel Isolation Technology
• Up to 48 Analog (± 50V) sensor inputs
• Expandable to 960 analog inputs
• Programmable Analog Output
• Integrated cellular modem
• Automatic data transfer via email or FTP
• Sending alarm via SMS or email
• Modbus for SCADA connection
• Web & FTP client / server
• USB memory for easy data and program transfer

Warranty: All dataTaker Data Loggers are covered by a 3 year warranty on workmanship and parts. For further information on the dataTaker range, or for useful downloads, visit the dataTaker web site at www.dataTaker.com or contact your nearest dataTaker office or distributor.

Quality Statement: dataTaker operates a Quality Management System complying with ISO9001:2008. It is dataTaker’s policy to supply customers with products which are fit for their intended purpose, safe in use, perform reliably to published specification and are backed by a fast and efficient customer support service.

Trademarks: dataTaker is a registered trademark.

Specifications: dataTaker reserves the right to change product specifications at any time without notice.

Designed and Manufactured in Australia.

“*Our ability to provide free software and support is dependent on applicable export control laws (including those of the United States) and the export policy from time to time of Thermo Fisher Scientific Inc.
What is dEX?

dEX is an intuitive graphical interface that allows you to configure your data logger, view real-time data in mimics, trend charts or tables and retrieve your historical data for analysis.

dEX runs directly from your web browser and can be accessed either locally or remotely, anywhere that a TCP/IP connection is available including worldwide over the Internet. You can use any of the logger’s built-in communications ports to view dEX including Ethernet, USB and RS-232.

Easy configuration

The dEX configuration editor allows you to view, edit and save logger configurations in an easy-to-use Windows Explorer style user interface.

Real-time monitoring

dEX displays real-time sensor measurements, calculations and diagnostic information using mimics, tables and trend charts.

Data retrieval

dEX allows you to retrieve your data at the click of a mouse button. Just select either All, Range or New Data Only.

- Built-in software – no application to install
- Runs directly from your web browser
- Accessible by Ethernet or USB¹ connection
- Intuitive graphical interface
- Easy-to-use configuration editor
- Access live and historical data
- View data as charts, mimics and tables

¹ USB port equipped models only.
**Browser-based solution**

dEX comes pre-installed on every logger in the DT80 range. The software loads in your web browser so there is no need to install cumbersome applications on your computer. Being browser-based, dEX is cross-platform and will work on all major operating systems including Windows, Mac and Linux. To simplify it even further, dEX starts automatically in your default web browser when you connect to your logger using a USB cable.

**Data that is compatible with your applications**

Logged data is ready to import into common spreadsheet and data processing applications such as Excel for further analysis and reporting. Data can be saved to your computer in comma separated (.CSV) format or our proprietary binary (.DBD) format.

**Command window**

The command window provides a terminal interface which allows the built-in command language of the logger to be used. Macro buttons allow common commands to be sent on a button press.

**Configuration editor**

The configuration editor allows you to view, edit and save logger configurations in an easy-to-use Windows Explorer style user interface. Tree view of configuration allows definition of measurement schedules and measurements.

Wiring diagrams show available wiring configurations for each sensor type. Configuration can be stored and retrieved on either the logger or a local computer.

**Channel list**

Displays name, value, units, alarm state, timestamp and logging state for each measurement.

**Customisation of the application**

The menu options, mimics panels and mimics can be added or removed to suit novice or advanced users. The color and brand name images within dEX can be customised to match corporate requirements or for personal preference.

Mimics are organised into panels which can be modified to highlight custom alarm conditions or data grouping. Mimics include dials, bar graphs, thermometers etc. Real-time chart recorder mimic allows you to view trends and historical data over a custom time/date range. Up to 16 mimics can be displayed on up to 5 mimic pages (default is 1 page of 6 mimics).

**Minimum system requirements**

- Web Browser (tested with): Internet Explorer V7 and above, Firefox, Safari & Google Chrome
- TCP/IP connection
- Adobe flash player 10 or higher
- Screen resolution of 1024 x 768

---

2 dEX operates on all DT80 Series 2, Series 3 and Series 4 except Series 1.
Technical Specifications

Analog Channels
16 analog input channels (expandable to 320*)
Each channel is independent and supports: one isolated 3-wire or 4-wire input, or two isolated 2-wire inputs, or three common referenced 2-wire inputs.
The following maximums apply:
- Two wire with common reference terminal: 48 (expandable to 960*)
- Two wire isolated: 32 (expandable to 640*)
- Three and four wire isolated: 16 (expandable to 320*)
*Expansion requires optional CEM20

Fundamental Input Ranges
The fundamental inputs that the DT85GM can measure are voltage, current, resistance, and frequency. All other measurements are derived from these.

Sampling
Integrates over 50/60Hz line period for accuracy and noise rejection.
Maximum sample speed: 40Hz
Effective resolution: 18 bits
Linearity: 0.01%
Common mode rejection: >90dB
Line series mode rejection: >35dB

Inputs
Inter-Channel Isolation: 100V (relay switching)
Analog Section Isolation: 100V (opto-isolated)
Input impedance: 16KΩ, >100MΩ
Common mode range: ±3.5V or ±35V (attenuator on/off)

Sensor Excitation (Supply)
Analog channels:
- selectable 2μA, 213μA or 2.5mA precision current source
- 4.5V voltage source
- switched external supply

General Purpose: Switchable 12V/5V regulated supply for powering sensors and accessories (max 300mA).
Analog Output
Isolated programmable 16-bit DAC: voltage 0-10V or current 0-24mA

Analog Sensors
Supports a wide range of sensors including, but not limited to, those listed below. A wide range of sensor scaling and linearising facilities including polynomials, expressions and functions.

Thermocouples
Calibration standard: ITS-90

RTDs
Materials supported: Pt, Ni, Cu
Resistance range: 150 to 1MΩ

Vibrating Wire
Frequency range: 500 to 5kHz
Col resistance: 50 to 200Ω
Stimulation method: single pulse pluck

Thermistors
Types: YSI 400xx Series, other types*
Resistivity range: up to 1MΩ
* Other thermistor types are supported by thermistor scaling and calculated channels.

Monolithic Temperature Sensors
Types supported: LM33 - 60, AD590, 592, TMPx, LM135, 235, 335

Strain Gauge and Bridge Sensors
Configurations: 1%, 1/4, 1/8 full bridge
Excitation: voltage or current

4-20mA Current Loop
Internal 1000 Ohm shunt or external shunt resistor

Digital Channels
Digital Input/Outputs
8 bi-directional channels
Input Type: 8 logic level (max 20/30V)
Output Type: 4 with open drain FET (max 30V, 100mA)
4 with logic output

Relay Output
1 latching relay, contacts (max: 30Vdc, 1A)

Counter Channels
Low Speed Counters
6 counters shared with digital inputs.
Low speed counters do not function in sleep mode.
Size: 32 bit Max Count rate: 10 Hz

Dedicated Counter Inputs
4 high speed or 2 phase encoder (quadrature) inputs
Size: 32 bit Max Count rate: 100 kHz
Input type:
- 2 logic level inputs (max ±30V)
- 2 sensitive inputs (100mV) for magnetic pickups (max ±10V)

Serial Channels
SDI-12
4 50-12 inputs, shared with digital channels. Each input can support multiple SDI-12 sensors.

Calculated Channels
Combine values from analog, digital and serial sensors using expressions involving variables and functions.
Functions: An extensive range of Arithmetic, Trigonometric, Relational, Logical and Statistical functions are available.

Alarms
Condition: high, low, within range and outside range
Delay: optional time period for alarm response
Actions: set digital outputs, transmit message, execute any data/taker command.

Scheduling of Data Acquisition
Number of schedules: 11
Schedule rates: 10ms to days

Data Storage
Internal Store
Capacity: 128MB (approx 10,000,000 data points)
Larger storage available refer to technical support.
Removable USB store device (optional accessory):
Types: compatible with USB 1.1 or USB 2.0 drives, e.g. Flash drive.
Capacity: approx. 90,000,000 data points per megabyte.

Communication Interfaces
Ethernet Port
Interface: 10BaseT (10Mbps)
Protocol: TCP/IP, Modbus (Master & Slave)

USB Port
Interface: USB 1.1 (virtual COM port)
Protocol: ASCII command

Serial Port
Interface: RS232, RS422, RS485
Speed: 300 to 57,600 baud
Flow Control: Hardware (RTS/CTS), Software (XON/XOFF), None
Protocol: Modbus (Master & Slave), Serial Sensor

Network (TCP/IP) Services
Uses Ethernet and/or Host RS232 (PPP) ports
Command Interface
Access the ASCII command interface of the DT85GM via TCP/IP

Web Server
Accesses current data and status from any web browser.
Custom pages can be defined. Download data in CSV format. Command/Interface window. Define mimic displays.

Modbus Server (slave)
Access current data and status from any Modbus client (e.g. SCADA system)

Modbus Client (master)
Read/write data from modbus sensors and devices including PLC’s, data/taker loggers, modbus displays etc.

FTP Server
Access logged data from any FTP client or web browser

FTP Client
Automatically upload logged data direct to an FTP server

System
Display and Keypad
Type: LCD, 2 line by 16 characters, backlight.
Display Functions: channel data, alarms, system status.
Keyboard: 6 keys for scrolling and function execution.

Firmware Upgrade
Via: RS232, Ethernet, USB or USB disk.

Real Time Clock
Normal resolution: 200 μs
Accuracy: ±1 min/year (6°C to 40°C), ±4 min/year (± 40°C to 70°C)

Power Supply
External voltage range: 10 to 30Vdc
Peak Power: 12W (12Vdc 1A)

Average power Consumption
Using 12Vdc external power source
Sampling Speed
Average Power
1 second 1330 mW
5 seconds 532 mW
10 minutes 130 mW
1 hour 72 mW

Integrated Cellular Modem
Features
Alarms: Send email or SMS messages
Data: Send data to an email address or FTP server
Remote access: Connect to UI/Command interface

Networks and Frequencies
Interfaces: EDGE, GPRS, GSM, WCDMA, HSPDA, HSDPA
EDGE/GPRS/GSM Frequency: 850/900/1800/1900 MHz
WCDMA/HSPA/HSDPA Frequency: 850/1900/2100 MHz

Physical and Environment
Construction: Powder coated zinc and anodized aluminum.
Dimensions: 300 x 137 x 65mm
Weight: 2.3kg (including 12Vdc power)
Temperature range: −40°C to 70°C
Humidity: 85% RH, non-condensing

Accessories Included
Resource CD: includes software, video training and user manual.
Comms cable: USB cable
Line adaptor: 110/240Vac to 15Vdc, 880mA
